## Experience

### **Amazon Go** • Web Development Engineer II

*April 2016 - Present • Seattle*

I work closely with the Head of Digital UX, senior engineers and our internal customers to deliver a suite of web apps vital for day-to-day store operations. We make data-driven design decisions via A/B testing with instrumentation to track and analyze user behavior at scale.

### **Amazon Go** • Web Development Engineer I

*January 2015 - April 2016 • Seattle*

First web-dev hire on a young team working on a key internal component of the Amazon Go operations. I worked with back-end engineers, designers and managers to build out a complex AngularJS web app. It features a custom HTML5 video player with 3D WebGL components.

### **Hydraulx VFX** • Full-stack Engineer

*March 2013 - January 2015 • Santa Monica*

Maintained a legacy PHP web app and Python software which ran a large on-site render farm, critical to the business. I pitched, designed and built a modern NodeJS+MongoDB+Redis replacement. Key features included real-time queue monitoring via WebSockets and power savings via dynamic shutdown of idle render nodes.

### **DZ Solutions** • Web Developer, PA

*September 2012 - March 2013 • Los Angeles*

Built simple LAMP-stack inventory management tools, while doing office administrative duties.

### **U.S. Fulbright Program** • English Teaching Assistant

*September 2011 - July 2012 • Hamburg, Germany*

Won a fully-funded competitive grant to teach English in German high schools.

## Education

### **Ball State University** • BAs in Film Studies & German

*2007 - 2011 • Muncie, Indiana*

Awarded an academic full-ride scholarship, along with a scholarship to fund study abroad at the Johannes Gutenberg Universität in Mainz, Germany.

## Skills

I spend my days deep in **Javascript, HTML and SASS**. I prove my code with **unit and integration tests**. I do full-stack development using **NodeJS and MongoDB**, with plenty of relational **SQL** experience. Sometimes I also work in **Python, Ruby** and others. I love photography and design and know my way around **Photoshop** and other creative software.
